The American Protection & Patrol Dog Association (APPDA) Program is designed to consistently and fairly test and evaluate the defense, fight, hunt drive, courage, endurance and the strength of character of each dog.

The APPDA Decoy must ALWAYS strive to challenge him/herself fully in the endeavor and to be a challenge for every competitor's dog. The skill of the Decoy is the most important aspect in achieving the APPDA goal. Most Protection Dog venues do not test the dogs to the extent of APPDA, and we want to remain proud of those dog teams certifying in APPDA.

We encourage Handler/Dog teams to arrive prepared- we are trying to move away from Prey type movements when testing the dog, and the dog may experience pressures that test its will to stay in the situation presented.

Do you have a staring problem? I'll lick you to death. I love cuddling and being the big spoon with the decoys. Andre Carmicheal holds the key to my heart. One day I hope to be walking on the beach with Andre sipping on margarita with a pink umbrella. Don't mind this guy holding my leash he don't know any better he just feeds me. So if anyone would be interested in taking him please do. All he seems to do is just embarrass me.

Signed,
Segen Vom Wasney

Christina Tanaka
Daughter of Darkness "Raven"
APBT

Purely Performance K9's LaFerriere's Daughter of Darkness is a 4yr old APBT. Raven and handler Christina train with North of the Wall K9 and they are competing for their APPDA L1. Raven and I participate in many activities such as APPDA, PSA, Barnhunt, Dock Diving, ADBA Lure Coursing and Raven has done time guarding businesses. She always gives me 100% of herself and is very forgiven of my mistakes but she is more then just my working dog, she is my homie. I wouldn't trust any other dog to have my back. Raven is the baddest female APBT in the game.
